

12 July 1963

STAT

Dear Hazel:

Subject: Engineering Change Order No. 1

We present for your consideration our initial change order in accordance with Document OSA-1614-63, dated 25 March 1963, as received from Wendell. This change order is related directly to the Navigation Panel (CG8006A1), and will double the destination capability of the INS. Our proposal is a result of discussions held between [redacted] of Headquarters.

Enclosed is our Engineering Change Proposal form presenting the required information together with our cost exhibits (Exhibits I and II), plus a pictorial presentation of the change.

We propose that the fabrication and assembly of the kits be under Contract FL-4004 (FY 64 Spares), while the installation of the 16 kits be under Contract FL-4003 (FY 64 Repair and Overhaul). The rates as contained within these two accounting exhibits are the same as our initial proposals for the FY 64.

For your information the material cost of [redacted] covering the kits consists of the following items:

Lighting Panel

Switch

Switch Handle

Add - Misc. and Scrap

We hope that we have given enough information to implement this change within the immediate future. If further information is needed, we would appreciate your calling Gil.

Very truly yours,

RAB:dh
